

Powerstick

Unique solution for more performance

More Power

With the newly developed Powerstick from Schick, the two power classes Q3 Basic and Q3 Profi can be retrofitted with additional power if required.

Your benefits

- ▶ Increase in speed by 10,000 rpm and 2 Ncm torque
- ▶ Simple and fast use of the Powerstick – no conversions required
- ▶ Subsequently a powerful plus in performance without the need to purchase an additional micromotor
- ▶ Not device-specific, can be used flexibly at different laboratory workplaces

TOP TECHNOLOGY MADE BY SCHICK

User-friendly & practice-oriented

Outstanding performance

The new Q3 series from Schick offers unbeatable performance parameters with up to 60,000 rpm and 11 Ncm. Thanks to new technology, the speed can be controlled extremely sensitively, making it ideal for processing even the most demanding dental materials.

Multifunctional and reliable

All important parameters are clearly displayed on the bright OLED display and are easy to read from all angles. Additional functions such as clockwise/anticlockwise rotation and cruise control leave nothing to be desired and can be conveniently activated via direct selection keys.

Three power classes

With three different performance classes, the Q3 covers the requirements of a wide range of applications. The three unit types are supplied with the following handpieces as standard:

- ▶ The **Q3 Basic** with Q Basic handpiece, which is perfectly suited for universal use in everyday laboratory work thanks to its robust design.
- ▶ The **Q3 Profi** with Q Profi handpiece, which thanks to the soft-grip surface lies comfortably in the hand and is therefore very popular and widespread.
- ▶ The **Q3 Premium** with Q Premium handpiece – the ultra-light and ergonomically perfectly balanced motor handpiece, which with its robust interior made of corrosion-resistant stainless steel is also suitable for the heaviest grinding, cutting and milling work.

**With Q3 you get absolute top technology
